

## Special Issue

# New Trends and Applications in Femtosecond Laser Micromachining

### Message from the Guest Editors

Femtosecond laser micromachining has been widely used in many research and industrial fields in applications ranging from material processing to microdevices' fabrication. Indeed, the strong versatility of femtosecond laser micromachining allows working with both transparent and absorptive materials by inducing permanent modifications in the bulk of substrates, by removing material or structuring surfaces or even by growing three-dimensional free-standing structure by direct laser writing. This Special Issue aims to highlight the latest achievements in various applications of femtosecond laser micromachining, with particular interest in new approaches that will pave the way to the future in this technology field. We are looking for research papers, short communications, and review articles that focus on new routes in the exploitation of femtosecond laser machining in the following applications:

- Surface structuring and patterning
- Drilling, cutting and welding
- Multiphoton polymerization
- Lab-on-chip
- Biophotonics
- Integrated optics

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
