# Special Issue

# MEMS for Ultrasound

### Message from the Guest Editors

Micro-electro-mechanical systems (MEMS) technology has demonstrated enormous potential in constructing micro transducers and micro sensors with outstanding performance due to its advantages of, for instance, miniaturization, high speed, high resolution, high temperature reliability, and convenience of batch fabrication. MEMS Ultrasound devices have been found to be useful in a diverse range of applications such as medical, microscopy, inkjet printing, non-destructive structure testing, fluid/particle manipulation, wireless power transfer, and other harsh conditions where conventional ultrasound transducers tend to fail. The materials, designs, modeling, structures, fabrication, integration, reliability, and applications of MEMS for ultrasound involve multiple disciplines, demanding researchers with diverse backgrounds to investigate.

# About the Journal

## Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

## Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen
Queensland Quantum and Advanced Technologies Research Institute, Griffith University, West Creek Road, Nathan, QLD 4111, Australia

## Author Benefits

**High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

**Journal Rank:**

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

**Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
