

## Special Issue

# Micro/Nano- Scale Energy Harvester

### Message from the Guest Editor

Interest in energy-harvesting technology has been rapidly growing over the past decade, due mainly to the increased demand and requirements regarding the use of sustainable power supplies in emerging technologies. The motivation behind energy harvesting is to convert this ambient wasted energy into usable electrical energy. Sources of ambient energy which could be scavenged include solar energy; thermal energy; radiated electromagnetic energy based on photoelectric, electromagnetic, piezoelectric, etc.; and mechanical vibrations that occur through walking, body movements, pulses, etc. For this Special Issue, designers, engineers, and scientists are invited to contribute manuscripts that address novel ideas in but not limited to the these topics: Novel energy-harvesting principles and device structure designs; Energy harvesting for powering the wearable/implantable electronics and robotics; Energy harvesting for water industry and sewage pipe inspection; AI and simulation tools and techniques to characterize the performance of energy.

### Guest Editor

Dr. Chitta Saha

School of Computing, Electronics and Maths, Coventry University,  
Coventry CV1 5FB GB, UK

### Deadline for manuscript submissions

closed (30 November 2020)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

---

### Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
