Special Issue

Microfluidic for Biological Applications

Message from the Guest Editor

Dear colleagues, Microfluidics is now found in many research laboratories involved in transdisciplinary research combining optics, physics, biology and chemistry. Recent advances towards organ-on-chip, point of care devices, biomaterial synthesis and biological component (proteins, cells) sorting and/or analysis benefit from the advantages provide by microfluidics (well-defined flow, low product consumption, size miniaturization, reduced time of analysis, single particle analysis, high throughput capabilities, integration of several functions). Concerning fabrication, continuous efforts are being made to provide new functionalized, structured (3D printing methods) or biodegradable materials with high biocompatibility within microfluidic devices. This Special Issue aims to highlight research papers and review articles on recent microfluidic developments for biological applications from DNA to tissue engineering. Particular attention will be paid to papers focusing on a biological issue where microfluidics offers an original and novel approach.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu
1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.8 days (median values for papers published in this journal in the second half of 2024).
