Microfluidics for Healthcare Based Applications

Message from the Guest Editor

Microfluidic platforms have performed important roles in healthcare applications because they have the capability of manipulating small amounts of fluids. Biofluids such as blood, urine, tear, sweat, and saliva are performing a crucial role to support human health and contain various important biomarkers. Also, mammalian cells in the microscale are basic building blocks of the human body. And, the human body is living with various kinds of microorganism which are also on the microscale. Controlling the biofluids and cells in a precise way allows microfluidics to take an important role in healthcare. Accordingly, this Special Issue is looking for research papers, short communications, and review articles that use microfluidics for the in vitro diagnostics, point of care testing, wearable sensors, implantable device, organ on a chip and biosystems.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen

Queensland Quantum and Advanced Technologies Research Institute,
Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
