Microfluidics for Health Monitoring

Message from the Guest Editor

Over the past 30 years, microfluidics has become a fundamental tool that is widely deployed in multidisciplinary fields, such as biology, chemistry, physics, and engineering. Among a variety of its applications, one of the most important aspects is health monitoring, which drew extra attention and proved to be directly beneficial to our daily lives during the COVID-19 pandemic. With the recent maturity and convergence of microfluidic related technologies, in terms of micro-device fabrication, biosensing, low power electronics, and internet of things, future health monitoring microfluidic devices may potentially accelerate the decentralization process of diagnostics from hospitals and clinics to homes and workplaces, where the microfluidic devices can greatly improve the accessibility of medical diagnostics and enable longitudinal and objective assessment of the health status of individuals in daily life.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
