

Special Issue

Miniaturized Generators, Volume II

Message from the Guest Editor

Miniaturized, small-size, down-scalable, on-chip, etc. generators are a relatively new field of research, and such products are more exotic, rather than popular, at this stage. However, the demand for such generators is growing at a rapid pace today. On land, in the ocean, and in space, there are already plenty of high-tech appliances with low and ultra-low power consumption which require long-term autonomous power sources. Smart networks are currently under development and anticipated to become widespread in the near future, and they consist of thousands of sensors that interact with each other and must work off-grid. In this Special Issue, we would like to discuss the diversity and potential of the existing energy sources suitable for conversion into electricity on a low power scale and the transducers for such energy conversion.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
