

## Special Issue

# Nanomaterials-Based Biosensors

### Message from the Guest Editors

We invite you to contribute to a SI of the journal *Micromachines*, "Nanomaterials-based biosensors", aiming to highlight advances in the development of biodetection devices including novel nanomaterials, (i.e. nanoparticles, nanotubes, nanowires, 2D material sheets) and architectures, fabrication and measurement strategies, as well as theoretical studies. We target the interdisciplinary community, acting in the area of materials science, nanosensors, biotechnology and lab-on-a-chip integrated systems, to create a synergistic collection of articles enabling necessary to improve quality of life.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
