Ocean MEMS and Related Technology

Message from the Guest Editors

Ocean MEMS is a fast-expanding field with many applications ranging from various MEMS sensors to energy-conversion devices. Ocean MEMS is important because of its miniaturization, low power consumption, and high integration. For example, MEMS-based instruments have been developed for measuring the conductivity, temperature, and pressure of seawater in real time. Some MEMS devices have been used to detect and separate heavy metal ions, ocean microorganisms, and other components in seawater. In addition, some systems have been developed to extract minerals such as sodium, potassium, and uranium, and to desalinate seawater. Ocean MEMS has also been used for ocean energy conversion. We invite papers related to ocean MEMS, including both fundamental studies and those on device/system development. We look forward to receiving your papers.

Guest Editors

Prof. Dr. Shizhi Qian

Department of Mechanical and Aerospace Engineering, Old Dominion University, Norfolk, VA 23529, USA

Prof. Dr. Teng Zhou

School of Electrical and Mechanical Engineering, Hainan University, Haikou 570228, China

Deadline for manuscript submissions

closed (30 June 2022)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen

Queensland Quantum and Advanced Technologies Research Institute,
Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
