

## Special Issue

# Origami Devices: Design and Application

### Message from the Guest Editor

Paper was invented about 2000 years ago. Due to its inherent folding ability, origami quickly became popular in several cultures and continued to develop for centuries. Nowadays, thanks to computer aided design and modern laser tools, origami is no longer only an art but also a technology. The transformation of 2D plain paper into 3D devices is intricate yet straightforward. The emerging tools are not only functional and useful, but also very interesting and innovative. Paper-based mechanisms, actuators, manipulators, positioners, robots, and machines have been built in recent years. In this Special Issue, we invite manuscripts conducting interdisciplinary research from areas of diverse expertise that can promote the further development of origami devices. Contributions related (but not limited) to paper-based actuators, foldable devices, and flexible manipulators are welcome. Furthermore, fundamental theories, dynamics, patterns, as well as fabrication techniques of origami devices are also desirable. Any paper-like thin films are included, too.

### Guest Editor

Dr. Shao-Kang Hung

Department of Mechanical Engineering, National Chiao Tung University, Hsinchu 30010, Taiwan

### Deadline for manuscript submissions

closed (30 June 2023)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
