

## Special Issue

# Nanostructured Optoelectronic and Nanophotonic Devices

### Message from the Guest Editors

The advancement of nanostructured materials development and the understanding of inclusive photo-physical phenomena have significantly contributed to the advancement of the optoelectronic field.

Furthermore, integrating nanomaterials with photonics has paved the way for developing highly efficient nanophotonic devices, which leads to improved interactions between light and matter. This Special Issue, “Nanostructured Optoelectronic and Nanophotonic Devices”, invites the authors to submit the recent results as original communications, articles, and reviews.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
