Special Issue

Piezoelectric Nanogenerators

Message from the Guest Editor

The next big thing that going to happened in the world is the Internet of Things (IoT), and sensors are going to be the backbone of it. Therefore, powering sensors using conventional batteries has become a challenge, as the number of sensors is going to be huge. Piezoelectric nanogenerators offer us the opportunity to make sensors self-powered, such that they can run by themselves by harvesting energy from their surrounding vibrations. Wearable piezoelectric nanogenerators can harvest energy from human motions and also can detect physiological signals for health care monitoring applications. Piezoelectricity also opens up the potential for new cooling (piezoelectric fan) and sound generation (piezoelectric speaker) systems.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
