Special Issue

Emerging Research on Molecular Sensors

Message from the Guest Editors

Molecular sensors are integrated receptor-transducer devices, which can convert molecular responses into external signals based on different approaches. The orchestration and development of molecular sensors are of primary importance for applications such as biosensing, gas sensing, and chemical sensing. Representative challenges in this field include the improvement of transducer performance, such as “3S+3R”, i.e., Sensitivity, Selectivity, Stability, Reproducibility, Response time, and Recovery time. To overcome the limitations of traditional analytical approaches and establish new methodologies, different techniques have been extensively explored to address the scientific and technical challenges in this area. Hence, in this Special issue, we aim to further explore various emerging techniques in molecular sensing, such as artificial intelligence, micro/nanomotors, microwave, microbalance, microfluidics, electrochemistry, photochemistry, and their combinations, focusing on the fundamental mechanism updates of traditional techniques and attempts to explore novel advanced analytical techniques.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen
Queensland Quantum and Advanced Technologies Research Institute, Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
