Smart Embedded Systems: A Self-Aware System-on-Chip (SoC) and Applications

Message from the Guest Editor

Given the increasing complexity of tasks faced by embedded systems, smart cyberphysical systems are the major focus for SoC implementations, which allow the resulting embedded systems to be self-aware, adaptive, and achieve a high level of resilience in the face of highly dynamic and unpredictable environments. The scope of this Special Issue is on smart embedded systems for novel cyberphysical applications, especially regarding embedded systems hardware. This Special Issue provides an excellent opportunity for communities from both research and industry to present new results. Of special interest are contributions that describe new methods, architectures, and applications of a self-aware system-on-chip (SoC). The topics of this Special Issue include but are not limited to cyberphysical SoC for smart embedded systems design and self-awareness for the design of architectural, physical, and circuit layers of SoC systems.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
