

Special Issue

Advances in Acoustic Microfluidics

Message from the Guest Editors

This growing field of acoustic microfluidics holds strong promise for a wide range of in vivo studies, in part, owing to the tissue penetration nature of sound waves, which, being non-invasive, can be applied as low-power gentle waves or, proving their versatility, as a high-power probe to intervene with cells and tissues. This dexterity and versatility make acoustofluidics an important field to be explored further to advance the technology and solve new and more challenging problems. Thus, we invite you to contribute to this new Special Issue with research papers, communications, and review articles to further develop this field from technological innovations to clinical applications. **Keywords:**

- Acoustofluidics
- Acoustophoresis
- Acoustofluidic cell separation
- Acoustically powered micro-machines
- Acoustic manipulation
- Acoustofluidic single-cell studies
- Acoustic tweezers

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
