Special Issue

Oxygen/Hydrogen-Based Electrocatalysis and Devices

Message from the Guest Editor

Hydrogen production by water electrolysis (HER/OER), hydrogen fuel cells (HOR/ORR), and regenerative fuel cells (HOR/ORR/HER/OER), which are devices that can operate alternately as an electrolyzer and as a fuel cell, is promising to generate and make full use of hydrogen energy as an environmentally friendly and efficient solution. However, the expensive and low efficient catalyst and the irrational electrode architecture seriously hinder their development. In addition, for metal-air batteries, especially Zn-air batteries (ZABs), the ORR and OER processes are sluggish, and the issues of catalyst and electrode optimization also must be considered. This Special Issue focuses on all topics dealing with catalysts, electrodes, and devices involving some important electrochemical reactions including ORR, OER, HOR, and HER, from fundamental to applied research. You are invited to submit recent advances in research to this Special Issue of Micromachines. Original research papers, communications, and review articles are welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
