

Special Issue

Frontiers in Biosensors

Message from the Guest Editor

Biosensors have grown exponentially and been developed broadly for the detection of food toxicity, medical diagnosis, chemical contamination, environmental monitoring, and other emerging applications. Although there have been a lot of achievements and improvements in developing biosensors for utilizing high sensitivity or selectivity and the rapid detection of biomolecule markers, there is still a great need for portable, automatic, field-deployable, and highly robust technologies. This Special Issue is dedicated to presenting the latest research on biosensor-relevant healthcare systems, early medical diagnostics, and environmental monitoring such as wearable biosensors, emerging biosensors, diagnostic pathogenic diseases, ultra-sensitive technologies, highly robust technologies, POC biosensors, nanobiosensors, and AI biosensors.

Guest Editor

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
 2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
