

Special Issue

Inorganic Nanoparticles for Biological Photoacoustic Imaging

Message from the Guest Editor

This Special Issue will highlight the recent advances in inorganic nanoparticles for biological photoacoustic imaging in (but not limited to) the following topics: nanoparticle fabrication, nanoparticle assembly, nanoparticle coating, characterization method, imaging mechanism study, 1st NIR imaging, 2nd NIR imaging, multiplexing, multimodality, ratiometric imaging, activatable imaging, biomedical application, and clinical translation. Please consider contributing your original research articles, short communications, and review articles to this Special Issue. We looking forward to your response. **Keywords**

- nanoparticles
- contrast agents
- photoacoustics
- inorganic
- theranostics
- molecular imaging

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
