

## Special Issue

# Microfluidics and Lab-on-a-Chip Applications for Biosensing

### Message from the Guest Editors

Microfluidics and the lab-on-a-chip concept have been found to be crucial for the integration, parallelization, and miniaturization of various tests with widespread application in pharmaceutical and life science research and environmental, industrial, and food safety areas. Introducing miniaturization will favor versatility, ease-of-use, time-to-result, and cost per test, hence benefitting both society and the business sector. As an example, the coverage of this concept is well reflected in the point-of-care molecular diagnostic market due to their small dimensions, accuracy, low cost, low power consumption, and portability. Therefore, this Special Issue seeks to showcase research papers and review articles focusing on lab-on-a-chip devices, namely by: (1) The development of novel designs for miniaturization, microfluidic devices and biosensors, using technological advances in nanomaterials and microtechnologies; (2) The integration in targeting applications, including, but not exclusively to nucleic acid analysis, drug delivery, point-of-care diagnostics, cellular and molecular detection, biotechnology, and engineering.

### Guest Editors

Dr. Laura Cerqueira

1. LEPABE-Laboratory for Process Engineering, Environment, Biotechnology and Energy, Faculty of Engineering, University of Porto, Rua Dr. Roberto Frias, 4200-465 Porto, Portugal

2. ALiCE-Associate Laboratory in Chemical Engineering, Faculty of Engineering, University of Porto, Rua Dr. Roberto Frias, 4200-465 Porto, Portugal

Dr. Joao Miranda

Transport Phenomena Research Center (CEFT), Chemical Engineering Department, Engineering Faculty, University of Porto, 4800-058 Porto, Portugal

### Deadline for manuscript submissions

closed (31 December 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
