Microfluidic-Based Technologies for Point-of-Care Diagnostics: Tackling Antimicrobial Resistance

Message from the Guest Editors

Antimicrobial resistant bacteria has been recognised as a global threat and requires a robust and collective response from every stakeholder of society and by public health institutions. Current standard technologies to tackle antimicrobial resistance (AMR) are time consuming, expensive, labour intensive and are central lab-based solutions. This poses an increasing threat, especially in remote areas where access to these sophisticated technologies is limited. Contrary to conventional technologies, microfluidics has become an enabling platform for point-of-care (POC) testing of AMR in healthcare, providing simple, robust, cost-effective and portable diagnostics. This is an emerging field globally and it can have a large impact on people's lives. Therefore, we propose that this Special Issue will attract high-quality publications from around the globe and will, hence, be of interest to readers.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Micromachines (ISSN 2072-666X) is a forum for cutting-edge interdisciplinary research on micro and nanoscale science and technology. We emphasise the practical, real-world value of micro and nanotechnologies that will place *Micromachines* in a leading position among engineering and technology journals.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen

Queensland Quantum and Advanced Technologies Research Institute,
Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
