

Special Issue

Microsystems for Space and Defense Applications

Message from the Guest Editors

Following the success of our previous Special Issue in 2020 ([Miniaturized Pyro Devices](#)), we are pleased to announce a further Special Issue of *Micromachines* dedicated to the latest research in optical trapping, to be titled “Microsystems for Space and Defense applications” and scheduled for publication in 2021. The Special Issue will accept diverse forms of contributions, including research papers, communications, methods, and review articles that represent high-quality, fundamental and applied research relating to Space and Defence technologies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
