

Special Issue

Nanostructure for Energy Conversion and Storage

Message from the Guest Editor

With rapidly growing concern over the global energy supply and consumption, there is an unprecedentedly high demand for the development of efficient energy conversion and storage systems. In particular, it is an urgent task to develop advanced materials with novel designs and functions that can overcome the current challenges of energy devices. Therefore, through this Special Issue, we are seeking inspiring studies that show recent progress in micro/nanostructures in relation to renewable energy storage and conversion. We invite you to submit research papers, communications, and reviews from a broad range of topics related to future energy resources, low emission energy conversion, energy storage, energy efficiency, and many other related applications. High-quality manuscripts will be published in the Special Issue after considerable peer-review. We will work hard toward the rapid and wide dissemination of your valuable research results, recent developments, and novel applications in the area of the nanotechnologies, renewable energy storage, and conversion.

Guest Editor

Prof. Dr. Inho Nam

School of Chemical Engineering and Materials Science, Institute of Energy Converting Soft Materials, Chung-Ang University, 84 Heukseok-ro, Dongjak-gu, Seoul 06974, Korea

Deadline for manuscript submissions

closed (1 November 2020)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
