

# Special Issue

## Advances in RF MEMS Devices

### Message from the Guest Editor

Radio frequency micro-electro-mechanical (RF MEMS) systems offer unique, low-cost, and exceptional RF performance, unmatched by their pure mechanical or silicon counterparts to many wireless applications. This Special Issue seeks original research presented as review and articles that showcase advances in RF MEMS devices, their applications, actuation mechanisms, and novel fabrication techniques. We are interested in RF MEMS technologies that enable distinct advantages in: i. high-performance high-power tunable microwave filters; ii. frequency-tunable and radiation pattern reconfigurable and steerable antennas; iii. frequency-selective surfaces; iv. impedance matching networks for extensive impedance coverage over wide frequency ranges; v. phase shifters with small phase-shift values and broadband frequency coverage; and vi. switching networks that offer low-loss ultra-wide bandwidth operation.

### Guest Editor

Dr. King Yuk Chan

School of Electrical Engineering and Telecommunications, University of New South Wales, Sydney, NSW 2052, Australia

### Deadline for manuscript submissions

closed (28 February 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

---

### Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
