

Special Issue

Smart Embedded Processors

Message from the Guest Editor

An embedded processor is a central processing unit specifically designed for processing signals from peripheral sensors or devices. It exists not only in simple toys or household appliances but also in consumer electronics, medical equipment, vehicles, aeroplanes, robots, and communication systems. Rapid advances in semiconductor manufacturing, sensor technologies, Internet of Things (IoT), and artificial intelligence (AI) mean that embedded systems can offer much more compelling functionalities than before. However, there are also demands to tackle technology-incurred challenges such as data handling/processing and energy-efficient computing. This Special Issue aims to provide a platform for interdisciplinary research into intelligent embedded processors and associated topics. It will include studies in areas in hardware (DSP, FPGA, microcontrollers, etc.)-embedded computing, energy-efficient embedded processors, AI-enhanced processing, and associated innovative applications.

- intelligent embedded systems
- embedded computing
- energy-efficient computing
- AI-enhanced processing
- FPGA-embedded processors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
