

Special Issue

Advanced Materials and Methods for Triboelectric Nanogenerators and Sensors

Message from the Guest Editors

Triboelectric nanogenerators (TENGs) are a novel clean and sustainable power generator that is capable of harvesting mechanical energy from micro-motions. Due to the diversity of designs and the flexibility of TENG devices, they are also able to be used as sensors to detect micro-motions without the need for additional power supply, which makes TENGs a promising candidate for green energy and wearable devices. Developing advanced materials and methods to boost the output performance and extend the application fields of TENGs are eternal subjects. Accordingly, this Special Issue seeks to showcase research papers, short communications, and review articles that focus on innovation in triboelectric materials, including material synthesis, modification, and engineering, and the ingenious design of TENGs for enhancing TENG performance, exploring new applications, improving sensing properties, etc.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
