Special Issue

3D In Vitro Tissue and Organ Models

Message from the Guest Editors

Worldwide, the scientific community is focusing on advancing new technologies for tissue engineering, cell biology, 3D printing, and microfluidics to overcome the problems associated with existing in vitro models. Undeniably, creative design concepts and the inclusion of the developmental and cellular biology of the target tissues or organs are moving us closer to this ultimate goal. In addition, developments in material science for the manufacture of scaffolds or microfluidic systems using specific techniques are contributing significantly to the reconstitution of cellular microenvironments for whole organs or functional human tissue units. Many in vitro human models, however, require further improvement, refinement, and/or validation to be considered as functional substitutes of tissues for drug testing that will replace preclinical animal studies or of organs for transplantation. This Special Issue welcomes your submission of research manuscripts and review articles that are related to advancements in the fields of tissue engineering, cell biology, material sciences and nanoscience. We look forward to receiving your submissions!

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu
Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
