Deadline for manuscript
submissions:

closed (30 November 2023)

Message from the Guest Editor

This Special Issue is the continuation of our previous Special Issue "Rhizosphere Microbial Community".

This Special Issue seeks contributions that explore the native bacterial community and diversity in the rhizosphere of plants, with the aim of sharing new findings on microorganisms' interactions with plants in the rhizosphere environment. Moreover, it will consist of articles that cover the isolation and characterization of microbes, genomic analyses and agronomic applications. Submissions of research articles, review articles, or short communications related to the rhizosphere microbial community are all welcome, and will help us to make unexpected new discoveries in this area.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
