Message from the Guest Editors

To obtain a better understanding of the problem of hospital-acquired infections and the changes in their antimicrobial treatment, this Special Issue aims to bring together original studies and literature reviews related to the epidemiology, microbiology, clinical characteristics, treatment and outcomes of these infections. Furthermore, studies focusing on antimicrobial stewardship and infection control regarding hospital-acquired infections are also welcome.

Deadline for manuscript submissions:
30 April 2024

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Microbiology) / CiteScore - Q2 (Microbiology (medical))
