Beneficial and Detrimental Microorganisms Occurring in Fermented Foods

Message from the Guest Editors

Dear Colleagues,

For this Special Issue of *Microorganisms*, dedicated to “Beneficial and Detrimental Microorganisms Occurring in Fermented Foods”, we invite you to submit contributions concerning any aspect of pro-technological, probiotic, spoilage, and/or pathogenic microorganisms occurring in fermented foods, as well as on the characterization, evolution, and metabolism of microbiota that occur during the production, storage, and distribution of these products.

Dr. Vincenzina Fusco
Prof. Hikmate Abriouel
Dr. Evandro Leite de Souza
Guest Editors

Deadline for manuscript submissions:
30 November 2021

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC and many other databases.

Journal Rank: JCR - Q2 (Microbiology)
