Message from the Guest Editor

Dear Colleagues, SARS-CoV-2 variants are currently classified as variants of interest (VOI) or variants of concern (VOC). A variant is considered a VOI when it has mutations that are suspected or known to cause significant changes and it is circulating widely. The World Health Organization continuously monitors the VOIs in case they spread more easily, cause more severe disease, escape the body's immune response regarding natural defense mechanisms or vaccines. Several VOCs have been detected, including the Alpha variant (B.1.1.7) first identified in the UK, Beta variant (B.1.351) in South Africa, Gamma variant (P.1/B.1.1.28.1) in Brazil, Delta variant (B.1.617.2) in India and more recently the Omicron variant (B.1.1.529) in South Africa in November 2021. From this perspective, we are pleased to invite you to present submissions on the topic, "Frontier Research in SARS-CoV-2 Infection and Variants", which deserves a Special Issue in Microorganisms.

Keywords: SARS-CoV-2; COVID-19; variant of concern; variant of interest; genomic genotyping; phylogeny; molecular genotyping; screening; GISAID (Global Initiative on Sharing Avians Influenza Data); Pangolin

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
