### Message from the Collection Editor

Dear Colleagues,

As follows from the title, this Topical Collection “Feature Papers in Microbial Biotechnology” aims to collect high-quality research articles, short communications, and review articles in all the fields of microbial biotechnology. Since the aim of this Topical Collection is to illustrate, through selected works, frontier research in microbial biotechnology, we encourage Editorial Board Members of the Microbial Biotechnology Section of *Microorganisms* to contribute papers reflecting the latest progress in their research field, or to invite relevant experts and colleagues to do so.

Prof. Dr. Peter Neubauer

*Collection Editor*

## Message from the Editor-in-Chief

“Microorganism” merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (SCIE - Web of Science), BIOSIS Previews (Web of Science) and other databases. Citations available in PubMed, full-text archived in PubMed Central.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 21.2 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the second half of 2018).
