Message from the Guest Editors

The Special Issue entitled “The Route of Mycotoxins from Farm to Fork” aims to present recent research on mycotoxins (including emergent, modified, or masked mycotoxins) in crop production, animal products production and the food chain. Some of its focal points include, but are not limited to, the following:

- distribution, ecology and inactivation of mycotoxigenic fungi
- occurrence, detection and segregation of mycotoxins in the food chain
- fate of mycotoxins during food processing

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))
