Message from the Guest Editors

Dear Colleagues,

The field of archaeal research has expanded and diversified considerably over the past decade, with many new and exciting developments. The objective of this Special Issue is to assemble articles that are representative of these recent developments, and to provide an updated focus on the specific features and properties of archaea and their viruses.

Prof. Dr. Roger A. Garrett

Prof. Dr. Bonch-Osmolovskaya

Prof. Dr. Don A. Cowan

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
