**Message from the Guest Editors**

Dear Colleagues,

The Special Issue entitled “Microbial Secondary Metabolites and Biotechnology” aims to offer deep insights into the latest developments of research dedicated to microbial biotechnology providing bio-based components and especially secondary metabolites. Some of its focal points include, but are not limited to, the following:

- The screening of active or useful novel bioproducts or in microbes’ metabolic investigations;
- Microbial metabolic diversity;
- Microbial biotechnologies;
- Promising or unexplored fermentations;
- Production process optimization;
- Microbial industrial technologies.

Dr. Mireille Fouillaud  
Prof. Dr. Laurent Dufossé

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, and many other databases.

Journal Rank: JCR - Q2 (Microbiology)
