

# Special Issue

## Gut Microbiota: Metagenomics to Study Ecology

### Message from the Guest Editor

*Microorganisms* is pleased to solicit manuscripts for a Special Issue on “Gut Microbiota: Metagenomics to Study Ecology”, with Lifeng Zhu. The issue is targeted towards metagenomic (including multi-omics) research of gut microbiome involved in all aspects of ecology. The gut microbiome plays an important role in host nutrition intake, the immune system, and health. Metagenomics has greatly advanced our understanding of gut microbial composition (metagenomic assembled genomes) and function (community genomics and microbiomics) that help us to reveal the ecological interaction between the gut microbiome and host. Further, metagenomics could shed light on the host local adaptation (e.g., diet and harsh environment). We will consider original scientific research articles, comprehensive reviews, comments, commentaries, and perspectives for publication. Topics of interest include gut microbial ecology, multi-omics studies, microbial genomics, host–microbe interactions, host local adaptation, and biodiversity conservation, all as related to gut metagenomics. All manuscripts will be peer-reviewed.

### Guest Editor

Dr. Lifeng Zhu

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
