

Special Issue

Editorial Board Members' Collection Series: Hepatitis Viruses: Who They Are and Consequences

Message from the Guest Editors

Expected papers:

- Update on the use of the hepatitis A vaccine?
- What are the new data regarding hepatitis E?
- Where is the epidemiology of hepatitis C that can be cured?
- HCV infection and PWID
- Hemodialysis: an HCV redoubt.
- Illustration of the substantial disparities in HBV burden between countries and regions but also within a country or region, income, race or ethnicity, and other social and cultural factors.
- How to improve the management of cirrhosis and liver cancer HBV-related deaths, (acute flares and reactivation, extrahepatic complications, and social stigma)?
- Current programs regarding Universal infant vaccination with timely birth dose and peripartum antiviral prophylaxis in mothers with a high level of HBV DNA?
- How to improve Underdiagnosis and low treatment rates of chronic HBV infection are serious even in high-income countries and exacerbated in low-income countries?
- What actions to remove the barriers that disrupt the current HBV care cascade and to close the gaps in HBV prevention, screening, diagnosis, linkage to care, antiviral treatment and liver cancer surveillance?

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
