

Special Issue

Surveillance of Viral Pathogens in the Environment

Message from the Guest Editor

This Special Issue of *Microorganisms* journal, entitled “Surveillance of Viral Pathogens in the Environment”, aims to study viral pathogens present in environmental matrices such as water, wastewater, surfaces, air and food. These samples can host viruses (or their genetic material) that can provide information about their contamination. In this regard, environmental surveillance can alert us to the possibility of tracking viral waves in the population and, at the same time, help us to identify possible sources of infection. This Special Issue will collect the research of colleagues that have conducted environmental monitorings of viral pathogens in order to obtain information on different aspects of the circulation of viral pathogens in the environment (materials and methods for their identification or presence of pathogens in particular areas).

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
