## Challenges in the Management of Infectious Complications in Neutropenic Cancer Patients

### Message from the Guest Editor

Due to the underlying malignancy and chemotherapy-induced neutropenia, neutropenic cancer patients are at high risk for severe infections, especially bloodstream infections (BSIs), one of the most common life-threatening complications in these patients. This Special Issue aims to collect papers on infectious complications in neutropenic cancer patients to better define the management and treatment of those diseases. Topics of interest include elucidating the epidemiology of infection, and accurate diagnosing pathogenic pathogens and their resistance phenotypes, and all as related to infectious complications in neutropenic cancer patients. We will consider original scientific research articles, comprehensive reviews, comments, commentaries, and perspectives for publication. All manuscripts will be peer-reviewed.

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
