

Special Issue

Viral Diseases: Current Research and Future Directions, Second Edition

Message from the Guest Editor

This Special Issue is a continuation of our previous Special Issue, titled "Viral Diseases: Current Research and Future Directions". Viral diseases continue to pose significant challenges to global public health, necessitating ongoing research efforts to understand their complex mechanisms and develop effective prevention and treatment strategies. In this Special Issue, we bring together a collection of articles that delve into various aspects of viral diseases. From fundamental studies elucidating the molecular mechanisms of viral replication and pathogenesis to clinical research exploring novel diagnostic tools and therapeutic interventions, each contribution provides valuable insights into combating viral infections and associated health complications. Moreover, this Special Issue will emphasize the interdisciplinary nature of viral disease research, spanning fields such as virology, immunology, epidemiology, and computational biology. As we navigate the complex landscape of viral diseases, it is crucial to not only focus on the immediate challenges but also anticipate and prepare for future threats.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Systems Biology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Virology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2026).
