The Latest Research on Human Papillomavirus

Message from the Guest Editors

Human papillomavirus (HPV) is associated with a wide range of diseases that impose a significant global burden not only on health but also on societies and economies. The virus causes diseases of the anogenital, skin, and oral regions of the body, in addition to other organs. These diseases contribute to high mortality and morbidity rates, with cervical cancer, in particular, being especially prominent in sub-Saharan Africa. Thus, recent HPV research has focused on improving prevention, early detection, improving treatment outcomes, and understanding its role in cancer progression. We welcome original research manuscripts, method-based articles, and reviews that highlight the latest HPV research across a variety of disciplines.

Guest Editors

Prof. Dr. Johannes Paul Bogers

Prof. Dr. Themba G Ginindza

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
