

Special Issue

Rhizosphere Microbial Community, 4th Edition

Message from the Guest Editor

This Special Issue is a continuation of our previous Special Issues “[Rhizosphere Microbial Community](#)”, “[Rhizosphere Microbial Community 2.0](#)”, and “[Rhizosphere Microbial Community, 3rd Edition](#)”. This Special Issue seeks contributions that explore the native bacterial community and diversity in the rhizosphere of plants, with the aim of sharing new findings on microorganisms’ interactions with plants in the rhizosphere environment. Moreover, it will consist of articles that cover the isolation and characterization of microbes, genomic analyses and agronomic applications. Submissions of research articles, review articles or short communications related to the rhizosphere microbial community are all welcome, and will help us to make unexpected new discoveries in this area.

Guest Editor

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
