Prevention and Treatment of *Helicobacter pylori* Infection Related Gastrointestinal Disease

Message from the Guest Editor

This Special Issue, titled "Prevention and treatment of *Helicobacter pylori* (*H. pylori*) infection related gastrointestinal disease", explores the prevention and treatment of gastrointestinal diseases caused by *H. pylori* infection. The Special Issue features several research articles that investigate the epidemiology, diagnosis, and treatment of *H. pylori* infection and its associated diseases. One of the key findings of this Special Issue is the importance of *H. pylori* eradication in the prevention and treatment of gastrointestinal diseases. *H. pylori* is a common bacterial infection that can lead to various gastrointestinal diseases such as peptic ulcer disease, gastric cancer, and gastric mucosa-associated lymphoid tissue (MALT) lymphoma. Several studies featured in this Special Issue investigate the efficacy of different treatment regimens for *H. pylori* eradication, as well as the impact of eradication on the prevention and treatment of associated diseases. **Keywords:** *Helicobacter pylori* (*H. pylori*); prevention; treatment; gastrointestinal disease

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
