Special Issue

Environmental Microorganisms as a Risk Factor of Healthcare-Associated Infections— Prevention Measures and Epidemiology

Message from the Guest Editor

Microorganism present in the healthcare environment could be a source of serious infections in patients and healthcare workers. Traditional and modern decontamination plays an important role in the prevention of microorganism transmission. Effectively implemented care bundles for the prevention of most common infection types is also of great importance in the prevention of transmission of microorganisms in healthcare environments. We cordially invite authors to submit articles focusing on all aspects of epidemiology and prevention of transmission of microorganisms (Clostridioides difficile, multidrug-resistant bacteria, airborne viruses, etc.) in healthcare environments as a part of improving patient safety.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
