# Nutritional Regulation on Gut Microbiota, 2nd Edition

## Message from the Guest Editor

Gut microbiome is a key homeostasis component for maintaining normal health, and its imbalance is implicated in the development of a number of common chronic and inflammatory diseases. Foods are the most important regulators for gut microbiomes. This Special Issue includes up-to-date research related to the effects of food, nutrient supplementation, and dietary therapy on gut microbiota in animal models, healthy subjects, or patients with chronic or inflammatory diseases from around the world. Research outcomes will help readers understand the roles of nutritional intake on the regulation of gut microbiota and the health of hosts, and encourage the use of nutritional prebiotic foods to prevent and manage relevant health disorders.

# About the Journal

# Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Editor-in-Chief

Dr. Nico Jehmlich Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

# Author Benefits

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
