

Special Issue

Microbiota in Human Health and Disease, 2nd Edition

Message from the Guest Editors

In this Special Issue, we invite researchers to submit manuscripts falling within the broad scope of "Microbiota in Human Health and Disease". We welcome original research papers, review articles, and case studies that focus on the interplay between microbial communities and their hosts. The primary goal of this collection is to showcase studies that not only deepen our understanding of the implications of changes in microbiota composition for disease states but also offer valuable insights into translational applications. Manuscripts exploring avenues for therapeutic and preventive interventions are of particular interest.

Guest Editors

Dr. Claire Morgan

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
