

Special Issue

Diagnosis and Treatment of Mammalian Infectious Diseases

Message from the Guest Editors

Pathogens circulate widely among mammalian hosts, with many of them causing severe disease and death in livestock, domestic animals, wildlife and humans. In recent years, many novel diagnostic tools, drugs, and vaccines have been developed and used for the management of zoonotic diseases. At the same time, awareness regarding mammalian infectious diseases—especially their diagnosis, epidemiology, surveillance and treatment—should be further raised among veterinarians, physicians, researchers, and the public, aiming to prevent future pandemics. This Special Issue of *Microorganisms* plans to collect the recent research in common or neglected mammalian infectious diseases. Original research articles and comprehensive reviews that cover the diagnosis, pathogenesis, transmission, epidemiology (including the associated environmental factors), surveillance, prevention, treatment, and evaluations of their impact on global health are welcomed.

Guest Editors

Prof. Dr. Labrini V. Athanasiou
Dr. Panagiotis Dimitrios Katsoulos
Dr. Constantina Tsokana

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
