

# Special Issue

## Trypanosomatid Biology

### Message from the Guest Editor

This Special Issue welcomes research articles, reviews and brief research reports devoted to the biology of these fascinating parasitic protists, focusing (but not limited to) on cell and molecular biology, genomics, ecology, host–parasite relationships, life cycles, intracellular bacteria and viruses. We look forward to receiving your contributions to the knowledge of the biology of trypanosomatids, including dixenous (*Trypanosoma*, *Leishmania*, *Phytomonas*) and monoxenous genera (*Leptomonas*, *Crithidia*, etc.).

- host–parasite relationships
- life cycles
- molecular and cell biology
- endosymbionts
- genomics

---

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
