

Special Issue

Veterinary Microbiology and Immunology

Message from the Guest Editor

This Special Issue provides a platform for the dissemination of knowledge on domesticated and wild animal microorganisms (bacteria, fungi, viruses) in terms of pathogenicity and diagnosis, disease prevention and treatment, epidemiological analysis, pathology, immunity, and vaccine development. It is intended for scientists who conduct research on wild and domesticated animals, veterinarians, conservation biologists, and immunological and vaccine scientists.

Guest Editor

Dr. Qihui Luo

College of Veterinary Medicine, Sichuan Agricultural University,
Chengdu, China

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
