

Special Issue

Antimicrobial Resistance in Italy: Current Situation and New Effective Solutions

Message from the Guest Editors

This Special Issue is designed to provide a comprehensive overview of the latest advances in the search for new and effective antimicrobial agents and the spread of resistant pathogens in Italy. We warmly invite Italian researchers in related fields to submit articles highlighting recent developments in this area. Contributions may include original research articles and in-depth reviews. We also encourage contributions from experts and colleagues in the field, ensuring a diverse and cutting-edge collection of works. This Special Issue aims to showcase the results of research conducted in Italy and provide a platform for further advances in antimicrobial agent and resistance research.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
