

Special Issue

Oral Microbes and Human Health, Second Edition

Message from the Guest Editors

This Special Issue is the continuation of our previous Special Issue, entitled “[Oral Microbes and Human Health](#)”. Oral microbiota are a diverse group of microorganisms that inhabit the human mouth and play a vital role in maintaining oral health. However, recent research has suggested that oral microbes may also significantly impact overall human health. This Special Issue aims to provide a comprehensive overview of current knowledge regarding the relationship between oral microbes and human health. We welcome the submission of high-quality original research and review articles whose scope includes, but is not limited to, the following topics:

- Oral microbiota
- Oral health
- Systemic diseases
- Microbial dysbiosis
- Immune response
- Therapeutic interventions

This Special Issue aims to advance our understanding of the complex interactions between oral microbes and human health, and to identify potential avenues for future research and therapeutic interventions. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
